BVPIEEE

About BVCOE

Bharati Vidyapeeth's College of Engineering, since its establishment in 1999, has strived to provide the best engineering education to its students through a dedicated faculty and well equipped labs.

- The college is affiliated to Guru Gobind Singh, Indraprastha University, New Delhi
- We are an AICTE approved, ISO-9100 certified institution
- BVCOE offers the Bachelors in Technology(B.Tech) degree in five disciplines
- House to over 2000 students in B.Tech only.

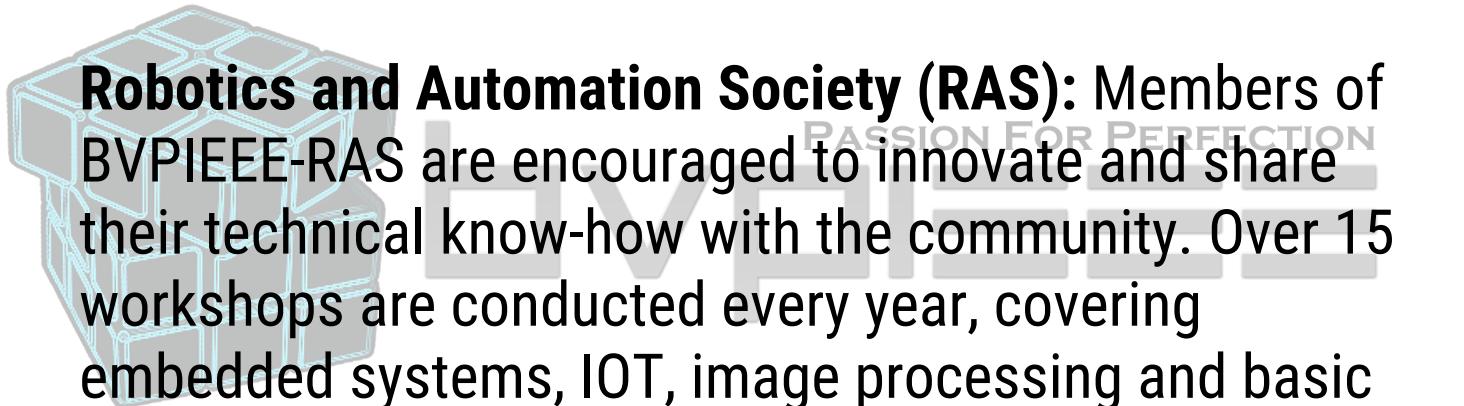

About BVPIEEE

BVPIEEE is the IEEE Student Branch of BVCOE. With the aim of creating a rich pool of technical expertise and harnessing the boundless youth potential, we offer a wide spectrum of opportunities and resources to our members. We have a really large student member base

BVPIEEE Student Chapters

The Student Chapters aim to increase the involvement of members in technical and academic endeavours. Each chapter conducts workshops and events throughout the year, with participation from students of other college as well.

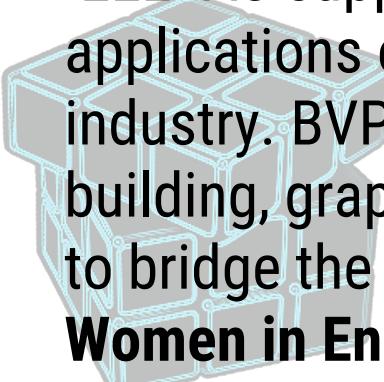

Robotics and Automation Society (RAS): Members of BVPIEEE-RAS are encouraged to innovate and share their technical know-how with the community. Over 15 workshops are conducted every year, covering embedded systems, IOT, image processing and basic electronics, among other topics and technologies. The members are given hands-on learning on platforms such as Arduino and Raspberry Pi and each series of workshops culminates with members making projects.

Eta Kappa Nu (HKN): IEEE-HKN is the honorary society of IEEE and is dedicated to encouraging and recognizing individual excellence in education. Workshops are conducted on tools that compliment academic growth such as research paper writing, LaTex and GitHub.

Computer Society(CS): BVPIEEE CS conducts over 25 workshops on a wide spectrum of topics including basics of programming through C/C++/Python; Android; Machine Learning and Deep Learning. A learning-by-doing approach is adopted, supplemented by the mathematical analysis of models in case of ML and DL.

Industry Applications Society (IAS):

IEEE-IAS supports professionals engaged in the applications of electrical and electronic engineering to industry. BVPIEEE-IAS organises workshops on resume building, graphics design and talks delivered by alumni to bridge the gap between industry and academics.

Women in Engineering (WIE)-Affinity Group: IEEE WIE is one of the largest international professional organisations dedicated to promoting women engineers and scientists. BVPIEEE-WIE conducts WIE-STAR, the annual student outreach program, to encourage high school students to take up STEM fields after graduation. WIE also organises talks by women working in technical fields.

BVPIEEE SIGs

CODEX: Various online and offline coding competitions are organised for members.

DRISHTI: Drishti is the Digital Arts society of BVPIEEE. It conducts photography-oriented sessions and workshops in which students are taught softwares like Adobe Photoshop.

E-Cell: The Entrepreneur Cell organises group discussions and interactive sessions so that students can brush-up their soft skills.

BVCOE Quiz Club(BQC): Quizzes are conducted on online platforms and offline.

GAMMA: Gamma is the Gaming and Multi-media Animation interest group of BVPIEEE. It involves its members in fun gaming sessions that turn out to be a great place for socialization and networking.

BVPIEEE Flagship Events

Throughout the academic session, BVPIEEE hosts its flagship events that have an outreach beyond Delhi-NCR. Undergraduates from colleges all over the country participate to win exciting prizes of several lakhs and turn up in great numbers too.

FERVOUR

Fervour is the annual techno-managerial fest organised by BVPIEEE.

Fervour X

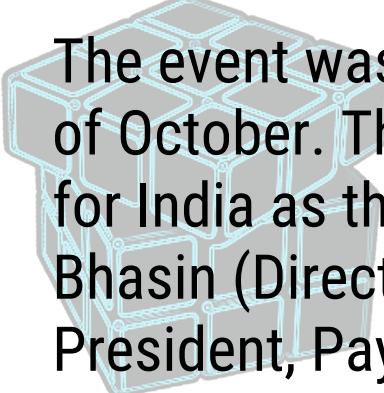

The 10th edition of the fest was organised in March 2018 with a lot of enthusiasm and saw a footfall of over 3000 students.

The flagship events, **Hacktivate- a 24-hour development hackathon**, where students developed solutions to real-life problems and **Technovation- a technical projects exhibition**, were a great success. The highlight of the fest was a drone show organised by SDIoT. Prizes worth 10 lakh were given away in various online and offline events.

WIEHack 2018

Women in Engineering(WIE) in collaboration with the special interest group CODEX organised an all women hackathon, the first of its kind in BVCOE, with the aim of promoting the practice of programming among women.

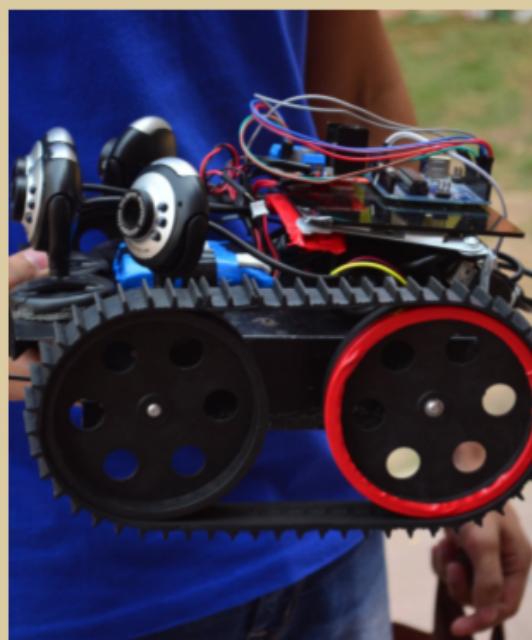

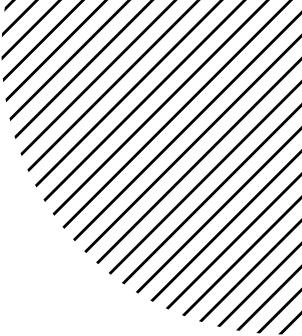

The event was successfully organised on 4th and 5th of October. This development hackathon, with Build for India as the Super Theme, was judged by Dolly Bhasin (Director, Incuspaze), Saurabh Jain (Vice-President, Paytm), Vertika Shukla (Sheroes), Garima Chhikara (Mentor, Coding Blocks), Jatin (Coding Blocks).

With 100 participants building solutions for India, the one of its kind hackathon was a success.
